EUROREPAR

STOP & START BATTERY

10 REFERENCES

95% Coverage rate

SERVICE LIFE
x3
when compared with standard conventional batteries

PRODUCT ADVANTAGES

- → ***Premium quality and compliance with current European regulations EN 50342 - 6***
- → ***An optimised range incorporating all STT battery technologies : EFB and AGM***
- → ***Reliable start-up, rapid recharge and corrosion resistance***
- → ***All our batteries are fitted with handles***

With 10 references, covering over 95% of vehicles currently in circulation in Europe, the Eurorepar Stop & start batteries range has been developed to **respond to the needs of the market**.

The Stop & Start system is very demanding on the battery as a result of the stopping and starting of the vehicles causing increased fuel consumption and CO^2.

Modern vehicles are equipped with an increasing number of components (GPS, DVD screens and smartphone interfaces, etc) which require a reliable energy supply.

This is why **Eurorepar EFB and AGM batteries are strengthened to ensure a reliable and durable energy supply**.

TECHNICAL CHARACTERISTICS

Eurorepar offers 2 Stop & Start battery technologies:

- **EFB (Enhanced Flooded Battery) for small and medium-sized vehicles.** This is also an opportunity to provide a vehicle with a more powerful battery, even if the vehicle does not have Start & Stop.
- **AGM (Absorbent Glass Mat) is more powerful: this makes it more suitable for light commercial vehicles,** which require more energy.

Eurorepar batteries stand out from the crowd due to their very high resistance to charge/discharge cycles, ensuring their high quality.

CONDITIONS FOR REPLACEMENT

One sign that a battery is worn out is when the engine no longer performs the "stop" action, and the Start & Stop orange indicator stays on… The battery should be inspected whenever the car is serviced or sent to an engine repair shop.

- AGMs should be placed with other AGMs
- EFBs should be replaced with other EFBs or AGMs
- Do not use conventional lead batteries
- A diagnostic tool should be used to identify, replace and reprogram the new battery in the controller.

REGULATIONS

- EFB Batteries: EN 50342 – 6 Standard and W3, C2, V2, M2 classifications
- AGM Batteries: EN 50342 – 6 Standard and W3, C2, V3, M3 classifications

Classification: **W**ater consumption, **C**harge retention, **V**ibration resistance, **M**icro cycle

Our parts are guaranteed for **2** years*

SECURE LABELS — Avoids any risk to fake parts and guarantees their quality.

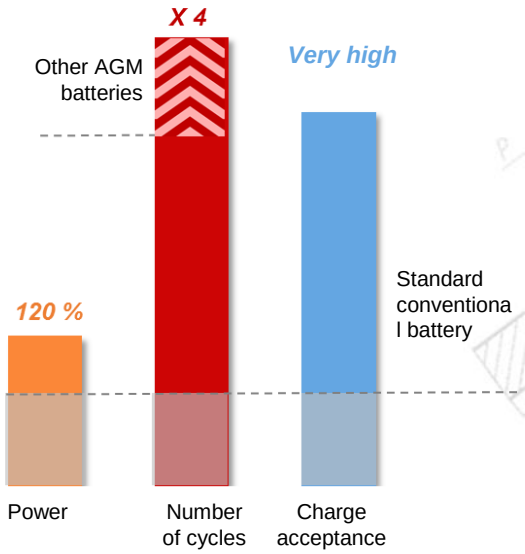
www.eurorepar.com

Our parts are guaranteed 2 years* against any manufacturing or material defect**.
(*) For Citroen, DS, Peugeot, Euro Repar Car Service repair networks: the warranty runs for 2 years, parts AND labour included.
(**) For the conditions of application, contact your dealer.

AGM BATTERIES PERFORMANCE

BATTERIES WITH AGM (Absorbent Glass Mat) TECHNOLOGY are made from thicker plates, held in electrolyte-absorbent glass microfibre coating kept under maximum pressure. This pressure reduces active mass loss with an extremely low internal resistance.

- This manufacturing method enables greater conductivity, which generates **maximum energy performance in all circumstances**.
- **A life cycle that is 4 times longer** than conventional batteries
- **Excellent cold-start capability** (even in extreme climate conditions), while also retaining comfort and security features.
- **Constant power** even for short journeys, urban traffic and in cases of greater energy usage when the car is moving slowly
- **100% waterproof** and tilt-resistant.
- **100% maintenance-free.**



EFB BATTERIES PERFORMANCE

BATTERIES WITH EFB (Enhanced Flooded Battery)TECHNOLOGY.

Eurorepar offers Enhanced Flooded Batteries, or EFBs, which provide greater reliability and performance when compared with standard lead-acid batteries for passenger and utility vehicles. The positive plate is covered with polyester, which allows it to retain active mass.

- **A life cycle that is 3 times longer** than conventional batteries
- **Maximum resistance** to short distances
- **100% maintenance-free.**
